PROFILE

Motivated Computer Science student with a strong interest in offensive security and penetration testing. Experienced with Linux environments, basic networking, and security tools. Seeking an opportunity to gain hands-on experience and contribute to real-world cybersecurity challenges at CyberLabSec.

PROJECTS

- **Offensive Security Toolkit (FYP)**
  - Built a multi-functional cybersecurity tool integrating WiFi attacks, RFID modules, and HID injection
  - Focused on ethical hacking and educational use
  - Used Linux-based tools and hardware integration (ESP32, RC522)
- **Web Vulnerability Testing Lab**
  - Tested intentionally vulnerable apps (DVWA / Juice Shop)
  - Practiced:
    - SQL Injection
    - Cross-Site Scripting (XSS)
    - Broken Authentication
- **Network Scanning Automation**
  - Developed Python scripts to automate Nmap scans and parse results
  - Helped identify open ports and vulnerabilities quickly

EDUCATION

UNIVERSITY OF AGRICULTURE
2023– 2027

Computer Science

BELLOWS COLLEGE
2021 – 2023

Intermediate in Biology,

SKILLS

Cybersecurity & Pen testing
- Basic Penetration Testing Methodologies
- Familiar with tools: Nmap, Burp Suite, Wireshark, Metasploit

Networking
- TCP/IP, DNS, HTTP/HTTPS
- Basic Packet Analysis

Operating Systems
- Kali Linux (primary)
- Linux CLI (strong understanding)

Platform Practiced

Hack The Box

INTERESTS

- Ethical Hacking & Red Teaming
- Vulnerability Research
- Security Automation
