PROFILE

Motivated Computer Science student with a strong interest in offensive security and penetration testing. Experienced with Linux environments, basic networking, and security tools. Seeking an opportunity to gain hands-on experience and contribute to real-world cybersecurity challenges at CyberLabSec.

PROJECTS

Offensive Security Toolkit (FYP)

- Built a multi-functional cybersecurity tool integrating WiFi attacks, RFID modules, and HID injection
- Focused on ethical hacking and educational use
- Used Linux-based tools and hardware integration (ESP32, RC522)

Web Vulnerability Testing Lab

- Tested intentionally vulnerable apps (DVWA / Juice Shop)
- Practiced:
    - SQL Injection
    - Cross-Site Scripting (XSS)
    - Broken Authentication

Network Scanning Automation

- Developed Python scripts to automate Nmap scans and parse results
- Helped identify open ports and vulnerabilities quickly

EDUCATION

UNIVERSITY OF AGRICULTURE
2023– 2027

Computer Science

BELLOWS COLLEGE
2021 – 2023

Intermediate in Biology,

SKILLS

Cybersecurity & Pen testing

- Basic Penetration Testing Methodologies
- Familiar with tools: Nmap, Burp Suite, Wireshark, Metasploit

Networking

- TCP/IP, DNS, HTTP/HTTPS
- Basic Packet Analysis

Operating Systems

- Kali Linux (primary)
- Linux CLI (strong understanding)

Platform Practiced

Hack The Box

INTERESTS

- Ethical Hacking & Red Teaming
- Vulnerability Research
- Security Automation
